

TRADING EDUCATION, SAMPLE

Mentorship Outline: 8 Modules

One-on-one education on how markets and order flow work and how to test and automate a rules-based plan. This is teaching, not signals or fund management.

Module	Topics	Outcome
1. Market basics	Spot, futures, leverage, funding, order types, fees	Read an order ticket without mistakes
2. Risk first	Position size, stop placement, risk per trade, drawdown limits	A written risk rule you follow
3. Market structure	Trend, range, support and resistance, liquidity, volume profile	Mark a chart before any trade
4. Order flow	Delta, footprint, absorption, open interest, liquidation data	Read what the tape shows
5. Building a plan	Entry, exit, journal, review routine	A one-page trading plan
6. Testing	Backtests, out-of-sample, costs, paper trading	Judge any strategy honestly
7. Bots and alerts	Python basics, exchange API keys, Telegram alerts, safe permissions	A paper-mode bot with alerts
8. Review and habits	Journaling, mistakes, stopping rules, when not to trade	A weekly review checklist

Format

Weekly 60 minute call, chart review of your own trades, homework between calls, and a short written summary after each session. Pace is set by the student, typically 8 to 12 weeks.

What we do not do

We do not sell signals, guarantee profit, trade your account or hold your funds. API keys, when used, are trade-only with withdrawals disabled.

Sample outline. Content and schedule are adjusted to each student.
